

Price of cable tray construction pulleys

AI Overview

Cable tray pulleys for cable laying typically range from £19 to £50 per unit or set, depending on material, size, and supplier. Price Overview Amazon UK offers a 5-set of nylon cable tray pulleys for approximately £19–£25, suitable for small to medium cable installations and DIY projects. OnBuy lists individual or small sets of cable tray pulleys priced around £19–£25, often with clamping or adjustable features for easier installation. Specialized suppliers like Cabledrumjacks provide heavy-duty galvanized steel cable tray rollers for industrial applications, which can cost more, typically £40–£50 or higher per unit, depending on size and load capacity. AliExpress and Alibaba offer a wide range of cable tray pulleys, including adjustable clamp models and nylon rollers, often with bulk pricing and international shipping options. Factors Affecting Price Material: Nylon pulleys are generally cheaper, while galvanized steel or heavy-duty industrial pulleys cost more. Size and Load Capacity: Larger pulleys designed for heavy cables or multiple cable runs are more expensive. Design Features: Adjustable clamps, sealed bearings, or U-shaped frames for suspension rollers increase cost. Quantity: Buying in sets or bulk often reduces the per-unit price. Supplier and Shipping: Local suppliers may offer faster delivery but slightly higher prices, while international suppliers may offer lower unit costs but longer shipping times. Recommendations For small-scale or DIY projects, nylon pulleys in sets of 5 are cost-effective and easy to install. For industrial or heavy-duty applications, invest in galvanized steel or heavy-duty rollers to ensure durability and smooth cable handling. Always check load ratings and compatibility with your cable size to prevent damage during installation. By considering these factors, you can select the right cable tray pulley within your budget while ensuring safe and efficient cable laying.
