

Price of high-quality fiberglass cable trays in South Asia

AI Overview

Fiberglass cable trays in South Asia typically range from \$15 to \$50 per meter, depending on type, size, and material quality.

Overview of Fiberglass Cable Trays

Fiberglass cable trays, also known as FRP (Fiberglass Reinforced Plastic) or GRP (Glass Reinforced Plastic) trays, are widely used in industrial, commercial, and outdoor installations due to their lightweight, corrosion-resistant, and high-strength properties. They are available in several types, including ladder, perforated, and channel trays, each suited for different cable management needs. FRP trays are particularly favored in chemical plants, power plants, offshore platforms, and coastal regions where corrosion resistance is critical.

Price Range in South Asia

India: FRP cable trays are available from suppliers like AMROCK and IndiaMART, with prices generally ranging from ₹1,200 to ₹4,500 per meter (~\$15-\$50 USD), depending on the tray type, width, and load capacity. Ladder-type trays are usually at the higher end due to their structural strength, while perforated or channel trays are slightly cheaper.

Southeast Asia: Market analysis indicates that cable trays, including fiberglass variants, are in high demand due to industrial and infrastructure growth, with prices influenced by local manufacturing, import duties, and material quality. While exact figures vary, the \$15-\$50 per meter range is a reasonable estimate for standard FRP trays.

Factors Affecting Price

Tray Type: Ladder trays are stronger and more expensive than perforated or channel trays.

Material Quality: Pultruded FRP trays with flame retardants or high chemical resistance cost more.

Dimensions: Wider or thicker trays designed for heavy cable loads increase the price.

Supplier and Location: Local manufacturers may offer lower prices than imported trays, but imported trays may provide higher durability or certifications.
