

Price of long-span cable trays in Boli

AI Overview

Long-span ladder cable trays in Pakistan typically range from PKR 3,500 to PKR 6,500+ per meter, depending on material, thickness, and finish. Overview of Pricing For heavy-duty, long-span ladder cable trays, which are ideal for industrial and commercial installations, prices vary based on:

- Material:** Mild steel (MS), hot-dip galvanized (HDG), stainless steel (SS 304/316), or aluminum. HDG and stainless steel trays are more expensive due to corrosion resistance and durability.
- Gauge/Thickness:** Thicker steel (12–16 gauge) increases load capacity and cost.
- Width and Span:** Wider trays or longer spans require more material, raising the price.
- Surface Finish:** Powder-coated or pre-galvanized finishes add to cost, especially for outdoor or corrosive environments.

In Pakistan, ladder cable trays designed for long spans (2.5–3.0 meters) and heavy power cables are priced around PKR 3,500–6,500+ per meter, with stainless steel or hot-dip galvanized trays at the higher end. Light-duty perforated trays start at approximately PKR 450 per meter, but these are not suitable for long-span heavy loads.

Factors Affecting Local Availability in Boli

- Local suppliers:** While Boli may not have direct manufacturing, suppliers in Lahore, Karachi, Islamabad, and Faisalabad can deliver nationwide.
- Shipping and logistics:** Delivery charges may vary depending on distance from major cities.
- Customization:** Custom widths, rung spacing, and bends can slightly increase the final price.

Recommendations

- For outdoor or industrial installations, choose hot-dip galvanized or stainless steel trays for long-term durability.
- Ensure load calculations and span requirements are considered to avoid under-specification, which can compromise safety and performance.
- Contact local distributors or manufacturers for exact quotes, as prices fluctuate with steel market rates and project specifications.

By considering these factors, you can estimate the cost of long-span cable trays in Boli and plan procurement effectively.
