

Price of protective casing for a level 3 distribution box

AI Overview

Protective casings for Level 3 distribution boxes typically range from £150 to £600, depending on material, size, and IP rating. Overview Level 3 distribution boxes require robust enclosures that provide protection against dust, water, and mechanical impact. Common materials include aluminum, polycarbonate, ABS, and glass fiber-reinforced polyester, each offering different levels of durability, corrosion resistance, and fire retardancy. The choice of material affects both the price and longevity of the enclosure. Price Factors Material: Aluminum and glass fiber-reinforced polyester enclosures are generally more expensive than standard ABS or polycarbonate boxes due to higher mechanical strength and corrosion resistance. Size and Capacity: Larger enclosures that can house multiple modules or terminals cost more. Standard sizes range from small junction boxes to cabinets up to 600 x 600 x 200 mm. IP Rating: Level 3 enclosures often require IP65 or higher to ensure protection against dust and water ingress, which increases cost. Customization: Optional features like transparent covers, hinged doors, key locks, or pre-drilled mounting plates can add to the price. Typical Price Range Small polycarbonate or ABS enclosures: £150-£250 Medium-sized aluminum or polyester enclosures: £250-£450 Large or fully customized enclosures with high IP rating: £450-£600 or more Where to Buy Industrial suppliers: Direct Industry and Amazon UK offer a range of enclosures suitable for Level 3 distribution boxes. Specialist casing manufacturers: Encasement and Pendock provide bespoke solutions for protective and decorative casings, which can be adapted for electrical distribution boxes. When budgeting, consider installation accessories, mounting plates, and potential customization, as these can significantly affect the total cost.
