

Price of temporary power distribution box circuit at construction site

AI Overview

Temporary power distribution boxes for construction sites typically range from \$50-\$500 per day for rental, depending on amperage, configuration, and supplier. Rental Pricing Temporary power distribution boxes are often rented rather than purchased for short-term construction projects. Rental rates vary based on amperage, number of outlets, and additional features: Small units (16A-32A, basic socket distribution): Approximately \$50-\$100 per day or \$200-\$400 per week. These are suitable for light tools and temporary lighting. Medium units (50A-125A, multiple outlets, locking or straight blade style): Typically \$100-\$250 per day or \$400-\$1,000 per week. These units can handle heavier equipment and multiple circuits. Large units (250A-1600A, modular or customisable units): Rental can range from \$300-\$500+ per day, depending on configuration and amperage. These are used for high-demand construction sites or rapid deployment scenarios. Some suppliers, like Boels, base daily rates on 8 operating hours and weekly rates on 40 hours, with surcharges for additional hours or weekend use. Delivery, setup, and optional accessories may incur extra costs. Purchase Pricing For permanent installations or long-term projects, purchasing a temporary power distribution box is an option: Basic site boxes: \$500-\$1,500 depending on amperage and number of outlets. Spider boxes or modular units: \$1,000-\$3,000 for units with multiple outlets, 50A-60A inlets, and rugged enclosures suitable for harsh environments. High-capacity modular distribution units (250A-1600A): \$3,000-\$10,000+, often customisable with MCCBs, Powerlock connections, or commando sockets. Factors Affecting Cost Amperage rating: Higher amperage units cost more due to increased capacity and safety requirements. Number and type of outlets: Locking outlets or multiple circuits increa...
