

Price quote for domestically produced optical fiber cables

AI Overview

Domestic fiber optic cables typically range from \$0.09 to \$6 per foot depending on fiber type, strand count, and construction. Material Costs Single-mode fiber (OS2): \$0.10 to \$0.50 per foot for standard cables; higher strand counts increase costs proportionally, e.g., a 12-strand cable around \$0.50 per foot and a 24-strand cable up to \$1.00 per foot. Multimode fiber (OM3/OM4): \$0.30 to \$1.00 per foot for standard indoor cables; high-performance or data center-grade multimode cables can reach \$1.50 to \$6 per foot. Armored or direct-burial cables: \$0.50 to \$5 per foot depending on protection level and environmental rating. Pre-terminated assemblies and patch cables: Prices vary by connector type and fiber count, generally higher than bulk cable due to factory termination. Construction and Environmental Factors Indoor vs. outdoor: Indoor riser-rated cables are cheaper than plenum-rated or UV-resistant outdoor cables. Jacket material: LSZH (Low Smoke Zero Halogen) jackets are standard for safety and compliance, slightly increasing cost compared to PVC. Cable type: Loose-tube construction for outdoor long-haul runs is more expensive than tight-buffered indoor cables. Bulk Pricing Wholesale bulk purchases can reduce costs to \$0.09 to \$1.52 per foot, depending on fiber count and quality. High-count backbone cables (e.g., 288 strands) can cost up to \$6 per foot. Installation Considerations Labor for installation is separate, typically \$1 to \$6 per foot, with complex installations reaching \$7 to \$12 per foot. Underground installation is more expensive than aerial or indoor runs, ranging from \$5,000 to \$80,000 per mile depending on urban complexity. Summary For a domestic procurement of optical fiber cables, expect the following approximate ranges:

Fiber Type	Strand Count	Construction	Price per Foot
Single-mode OS2	12	Indoor	\$0.50
Single-mode OS2	24	Indoor	\$1.00
Multimode OM3...
