

RoHS compliant enclosure rack wall-mounted type

AI Overview

RoHS-compliant wall-mounted enclosures and racks are available in steel, aluminum, and polycarbonate, offering IP/NEMA-rated protection for industrial and IT applications. Overview RoHS-compliant enclosures are designed to limit hazardous substances in electrical and electronic equipment, ensuring environmental safety while protecting sensitive components. Wall-mounted types are ideal for space-saving installations, providing secure housing for electrical controls, instrumentation, or network equipment. Material and Construction Steel Wall Boxes: Often zinc-coated or stainless steel, providing high durability and IP66 protection against dust and water jets. They include back plates, door mounting plates, gland plates, and sealing gaskets for secure installation. Aluminum Enclosures: Lightweight, corrosion-resistant, and suitable for indoor or outdoor use. Die-cast aluminum models can be mounted on walls or machines and are often IP67-rated.

Polycarbonate/Fiberglass/ABS: Lightweight, impact-resistant, and suitable for harsh environments. These materials are often used for miniature or modular enclosures.

Sizes and Standards Industrial Enclosures: Available in various sizes to accommodate electrical components, DIN rail-mounted devices, or instrumentation. NEMA and IP ratings vary to meet environmental protection requirements. IT/Network Racks:

Compact 19" wall-mounted enclosures are available for small network applications, providing flexible access and mounting options. Custom Options: Some

manufacturers offer custom paint, modular designs, and accessories for internal organization, ventilation, or cable management. Features Ingress Protection:

IP66-IP69K ratings for dust and water resistance, suitable for indoor and outdoor environments. Mounting Options: Wall brackets, panel cutouts, or direct surface mo...
