

Router connected to the company s fiber optic interface

Overview

Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled "ONT" or "Fiber"). Data travels as light pulses through thin glass or plastic fibers, allowing for high bandwidth capacity and minimal latency. This method enables significantly faster speeds and greater stability compared to traditional copper-based connections. According to. I'm looking for a cisco router to authenticate the internet provider and that allows fiber optic communication.
