

Second-stage distribution box

Overview

Class II distribution box is the distribution box, also known as sub box, which is generally responsible for a power supply area. Today, electrical systems are essential for homes and industries. This 6-channel stage power distribution box is designed to convert a 19-pin male power input into six TRUE1 female socket outputs for professional lighting systems. With AC90-240V input compatibility and 16A output capacity on each channel, it provides a clean way to distribute power from one main. Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers. Many feeders leave substation in a concrete ducts and are routed to a nearby pole. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation.
