

Singapore Access Switch

AI Overview

Access switches in Singapore range from high-density enterprise models to compact multi-gig desktop switches, offering PoE, 1G/2.5G/10G ports, and flexible deployment options.

Types of Access Switches

- Enterprise and SMB Access Switches**

TP-Link Access Plus Series: Designed for high-density edge deployments, these switches feature 1G downlink ports and 10G uplinks, supporting simultaneous connectivity for many devices. They come in 28 or 54-port rackmount designs and offer variable PoE budgets depending on the power supply modules, making them suitable for offices, campuses, and large-scale deployments.

FS.com Gigabit and 10Gb Switches: These switches provide Layer 2/Layer 3 features, offering flexibility from access to core networks. They are ideal for converged campus, SMB, and enterprise networks, supporting scalability and advanced network management.

Legrand PoE Switches: Managed Ethernet switches with 10 RJ45 ports and SFP uplinks, including PoE support for powering devices like IP cameras and Wi-Fi access points. Power supply options vary, e.g., 24V-100W, suitable for small to medium IT networks.
- Desktop and Multi-Gig Access Switches**

TP-Link TL-SG105-M2: A 5-port 2.5G desktop switch providing up to 25 Gbps switching capacity. It supports auto-negotiation for 100Mb/1G/2.5G, enabling seamless integration with existing gigabit networks without upgrading cabling. Ideal for home offices, small offices, or gaming setups, it features fanless silent operation and plug-and-play deployment.

Key Features to Consider

- Port Speeds:** Options range from 1G, 2.5G, to 10G uplinks for high-performance networks.
- PoE Support:** Essential for powering devices like Wi-Fi access points, IP cameras, and VoIP phones.
- Form Factor:** Rackmount for enterprise deployments or compact desktop switches for small offices.
- Scalability:** Layer 2/3 features allow network expansion and integration with core switches.
- Ease of Deployment:** Plug-and-play models reduce setup complexity, while managed switches offer advanced configuration options.
