

Smart PDU Initial IP

Overview

To access the web page, just type the IP address of the PDU into a browser e., The status tab is shown and displays PDU status items as well as relay status. An IP controlled PDU redefines power management by enabling remote monitoring and control of energy distribution. These intelligent power strips empower you to optimize energy usage, balance loads, and prevent overloads in real-time. Facilities using such solutions have reported up to a 20%. Thanks for choosing the 4 Port IP switched PDU with integrated energy metering and monitoring functionality per outlet and redundant TCP/IP port. It supports up to AC110V~250V 10A IEC C14 power input and four 10A IEC C13 outlets. Only one outlet at a time is turned on/off, even when all the outlets are requested to turn on/off at the same time.
