

The core switch has no network connection

Overview

To fix network connection issues on a switch, start by checking physical connections and cables. Reboot the switch and connected devices. Check for firmware updates and apply if necessary. Make sure that is reflected in your config: 11-26-2021 12:14 AM - last edited on 11-27-2021 11:50 PM by Translator Hello, not sure if this is a typo ?

According to your configuration, the WAN. The Router is set to use the wrong interface for the NAT overload. It is. We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to remove some unused VLANs. When I saved the configuration, everything stopped working and now we don't know what to do. We already rebooted both. This article will list a few simple steps about how to do a check on the switch when the switch has no Internet access and try to solve the problem.
