

The fiber optic terminal box displays a red LOS light

Overview

When the LOS light turns red or blinks red, it usually means your ONT or fiber router is not receiving the optical signal properly from the network. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP). Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. Existing Krishii Fiber customers can share their registered mobile number, area and a. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems.

Article Content
