AI Overview

Fiber optic pigtaills are widely available for purchase, with prices typically ranging from a few dollars to around \$10–\$15 per unit depending on type and specifications. Availability Fiber optic pigtaills can be purchased from multiple online retailers and specialized suppliers. They are available in singlemode and multimode variants, including OM1, OM3, OM4, and OM5 specifications, and come with a variety of connector types such as LC, SC, ST, FC, and E2000 . Both standard pre-terminated pigtaills and custom-made options are offered, with features like tight buffer, armored, or bend-insensitive fiber for easier splicing . Suppliers like Amazon, EFB-Elektronik, FS, and Fibertronics provide fast shipping and flexible ordering options . Pricing Standard singlemode or multimode pigtaills generally cost \$3–\$10 per piece, depending on fiber type, connector, and length . High-performance or custom pigtaills with specialized coatings, armored designs, or bend-insensitive fibers may cost \$10–\$15 or more per unit . Bulk orders or custom assemblies often require a quote from the supplier, which can provide discounts for larger quantities . Key Considerations Connector type: Choose LC, SC, ST, or FC based on your network equipment. Fiber type: Singlemode (9/125 μm) for long-distance, multimode (50/125 μm or 62.5/125 μm) for shorter distances. Length and jacket type: Standard lengths are available, but custom lengths and jacket materials can be requested. Purpose: Pigtaills are ideal for fusion splicing and connecting fibers to network components, while patch cables are better for flexible interconnections between devices . In summary, fiber optic pigtaills are readily available for both standard and custom applications, with prices starting from a few dollars per unit and increasing for specialized or custom designs. Suppliers provide detailed specifications and ordering options to suit different networking needs .
