

Unit Price of Long-Span Cable Trays in the UK

AI Overview

Long-span cable trays in the UK typically range from £50 to £200 per 3-meter section, depending on material, width, and load capacity.

Pricing Overview

Heavy-Duty Galvanised Steel Cable Trays: A 300mm wide, 3-meter pre-galvanised steel tray can cost around £50–£70 per unit, suitable for industrial and commercial installations with high load requirements. Wider trays, such as 600mm, may cost £120–£200 per 3-meter section, depending on the manufacturer and finish.

Stainless Steel Cable Trays: 304 or 316 grade stainless steel trays are more expensive due to corrosion resistance, typically £150–£250 per 3-meter section, ideal for harsh or outdoor environments.

Wire Mesh or Basket Trays: These are generally lighter and easier to install, with prices ranging from £50–£120 per 3-meter section, depending on width and mesh density.

PVC or Plastic-Coated Trays: These offer weather and fire resistance, with unit prices around £60–£130 per 3-meter section, depending on size and load rating.

Factors Affecting Price

Material: Stainless steel is the most expensive, followed by galvanised steel, then PVC or wire mesh.

Width and Depth: Wider and deeper trays designed for higher cable loads cost more.

Duty Rating: Light, medium, and heavy-duty trays differ in price; heavy-duty trays are significantly more expensive.

Accessories: Couplers, bends, risers, and lids add to the total cost.

Supplier and Delivery: Prices vary by supplier; some offer trade discounts, bulk pricing, or fast delivery options.

Suppliers in the UK

RS Components: Offers a wide range of ladder, wire mesh, and stainless steel trays with fast delivery.

Direct Channel UK: Specialises in heavy-duty pre-galvanised steel trays with trade pricing available for bulk orders.

Unitrunk via Cable Joints UK: Provides light, medium, and heavy-duty trays with multiple finishes and nationwide delivery.
