

Waterproofing the top of the distribution box

Overview

Sealing strips are the core component of the distribution box's waterproofing system. The industry commonly uses EPDM foam strips, whose excellent aging resistance can withstand long-term UV exposure. Selecting and installing the right protective enclosure ensures long-term electrical safety in demanding environments. This guide primarily analyzes structural engineering characteristics. (1) Waterproof distribution box engineered for harsh outdoor and industrial environments, providing IP65–IP68 sealing against dust, rain, and UV. Built with durable materials, CE & ROHS certified. Contact us for custom solutions! The Waterproof Electrical Distribution Box, with its high-definition transparent cover, is a transparent panel that not only allows for easy monitoring of the internal components, but also enhances the overall aesthetics, making it perfectly suited for functional applications.
