

What color is a 10 Gigabit fiber optic pigtail

Overview

The FC Single mode fiber optic pigtail version, is typically a yellow jacket, the FC Multimode fiber optic pigtails is typically a orange or aqua jacket and the FC Multimode OM3 10 Gig Laser Optimized version is typically Aqua in Color.

Understanding fiber-optic color codes is essential for any technician tasked with installing, maintaining, or troubleshooting modern fiber networks. By adopting the TIA/EIA-598C standard, you gain a universal “language” of colors that speeds identification, reduces miswiring, and enhances safety. An LC OM4 fiber optic pigtail is a type of optical fiber cable that has an LC (Lucent Connector) connector on one end and bare fibers on the other end. The connector end is polished and tested under factory conditions, ensuring low insertion loss and high return loss. 0 meter length FOCONEC produces SC OM4 Fiber Optic Pigtail, 900um cable with a tight buffer layer in aqua color. Factory terminated pigtails can easily be fusion or mechanically spliced to an existing fiber line.
