

What kind of cable trays does Brazil use

Overview

The product range encompasses various types, including ladder, perforated, and solid-bottom trays, manufactured from materials such as steel, aluminum, and fiberglass to meet diverse application requirements for load capacity, corrosion resistance, and fire safety. Cable trays are support systems designed to carry and organize insulated electrical cables, power lines, telecommunications wiring, and control cables. They provide a safe and efficient alternative to traditional conduit systems, allowing for organized routing, ease of installation, and simplified. The Eletropoll Group stands out in the manufacture of products for industrial infrastructure. The tray unit has a complete line of products, such as cable trays, profiles, beds, accessories, fasteners, support, lighting busbars, among others.
