

What router should I use for a 200Mbps fiber optic connection in Grenada

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Whether you're a gamer, a streamer, or simply someone who values a seamless online experience, the best router for 200mbps is here to revolutionize your internet connectivity. I worked with the Cybernews research team to review and compare different routers and give. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space. However, the market is flooded with countless options, making the selection quite overwhelming.
