

Wholesale price for outdoor cold aisle type for computer rooms

AI Overview

Wholesale cold aisle containment systems for computer rooms typically range from \$500 to \$2,500 per aisle section, depending on materials, size, and customization options. Overview of Cold Aisle Containment Cold aisle containment systems are designed to separate hot and cold air in data centers, improving cooling efficiency and reducing energy costs. They can include doors, panels, ceilings, and modular walls that fit standard rack configurations (42U, 45U, 48U) and can be customized for aisle width and height. Outdoor-rated systems may require weather-resistant materials such as flame-retardant polycarbonate or aluminum framing. Pricing Factors Material Type: Clear polycarbonate, anti-static plastics, or FM4910-rated materials are commonly used. Higher-grade materials increase durability and energy efficiency but also raise costs. Modularity and Size: Modular kits with adjustable beams, sliding doors, and telescopic frames allow flexibility but can cost more per aisle section. Customization: Custom widths, heights, and additional features like digital temperature monitoring, humidity control, or alarm systems can increase wholesale prices. Quantity: Bulk orders often receive discounted pricing, with suppliers offering competitive rates for multiple aisle sections. Typical Wholesale Price Ranges Basic modular panels: \$500-\$800 per 4-8 ft section Mid-range systems with doors and ceiling panels: \$1,000-\$1,500 per aisle section High-end fully customized systems: \$2,000-\$2,500+ per aisle section, including advanced monitoring and energy-efficient features Additional Considerations Installation: Many systems are designed for tool-free or minimal-tool assembly, reducing labor costs. Energy Efficiency: Proper containment can reduce cooling costs by up to 25%, which is a significant operational saving over time. Compatibility: Ensure the system fits y...
