

Wholesale price of rack-mounted PDU energy-saving type

AI Overview

Wholesale rack-mounted energy-saving PDUs typically range from \$50 to \$500 per unit, depending on type, capacity, and features.

Overview Rack-mounted PDUs (Power Distribution Units) are essential for distributing power efficiently in server racks and data centers. Energy-saving or intelligent PDUs help reduce power consumption, monitor usage, and provide remote control over outlets, which can lower operational costs and improve energy efficiency.

Types and Features

- Basic PDUs** – Provide straightforward power distribution without monitoring; ideal for cost-effective bulk deployment. Wholesale prices generally start around \$50–\$100 per unit.
- Metered PDUs** – Include input or outlet-level metering to track energy usage. These units typically cost \$150–\$300 per unit at wholesale.
- Switched PDUs** – Allow remote on/off control of individual outlets, useful for rebooting devices or managing power remotely. Wholesale prices range from \$200–\$400 per unit.
- Managed/Intelligent PDUs** – Offer full monitoring, outlet-level switching, and advanced energy management. These are the most expensive, with wholesale prices often \$300–\$500 or more per unit, depending on capacity and brand.

Factors Affecting Price

- Power capacity:** Higher kW ratings increase cost.
- Number and type of outlets:** More outlets or mixed IEC/NEMA types raise the price.
- Energy-saving features:** Remote monitoring, metering, and switching add to the cost.
- Brand and supplier:** Established brands like Eaton, APC, Dell, and Schneider Electric may be priced higher than generic Chinese manufacturers.
- Bulk quantity:** Purchasing in larger quantities often reduces the per-unit cost.

Wholesale Sourcing Platforms like Alibaba and Global Sources offer a wide range of rack-mounted PDUs at wholesale prices, including energy-saving models suitable for indoor and outdoor use. For enterprise-grade PDUs, suppliers like Eaton...
