

Wiring of Integrated Distribution Box in Australia

Overview

AS/NZS 3000 Section 5 sets the rules for the Multiple Earthed Neutral (MEN) system used across Australia and New Zealand, the sizing of the main earthing conductor, and equipotential bonding of metallic services and structural steel. Welcome to this Sixth edition 3rd revision of the WA Distribution Connections Manual, now known as the Western Australian Service and Installation Requirements (WASIR). It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Whether it's a home, office, or factory. Must be installed by a licensed electrical contractor or licensed electrician only. From advanced manufacturing processes to attention to detail in both appearance and internal design.
