

Xiaomi routers that support fiber optic interfaces

AI Overview

The Xiaomi Router Be5000 and Mi Router 4A Gigabit Edition are compatible with fiber optic internet, offering high-speed WAN ports and stable performance for modern broadband connections. The Xiaomi Router Be5000 is specifically designed for fiber optic internet, featuring a dedicated 2.5Gbps WAN port that supports high-bandwidth fiber-to-the-home (FTTH) services, making it suitable for multi-gigabit plans. It maintains stable speeds under heavy load, with wired devices consistently achieving near-gigabit performance without throttling or packet loss. The Be5000 integrates seamlessly with the Xiaomi Mi Home ecosystem, allowing smart home management and eliminating the need for additional media converters or switches. Its hardware is optimized for fiber, providing improved latency for video calls and faster file transfers between networked devices.

The Mi Router 4A Gigabit Edition supports fiber-optic broadband through its gigabit WAN port and two gigabit LAN ports, enabling network speeds of 100 Mbps and above. It features a dual-core CPU for smooth data transmission and dual-band Wi-Fi (2.4 GHz and 5 GHz) with speeds up to 1167 Mbps. The router includes four high-gain external antennas and integrated signal amplifiers to ensure wide coverage and strong Wi-Fi performance, making it suitable for medium-sized homes.
