

Xqj cable tray X represents

AI Overview

XQJ cable trays are represented by their type, dimensions, material, surface treatment, and installation orientation, reflecting ladder, tray, or trough configurations for power, control, and communication cables. Types and Structural Representation XQJ series cable trays are generally classified into three main types: ladder type, tray type, and trough type. Ladder Type: Features side rails with rungs, providing excellent ventilation for power cables but limited dust and interference protection. Often used where heat dissipation is critical. Tray Type: Full-cover or slotted bottom trays suitable for control, communication, and sensitive cables, offering dust-proof and interference shielding properties. Trough Type: Enclosed or semi-enclosed trays providing protection against dust and electromagnetic interference, ideal for sensitive or high-density cable layouts. Dimensions and Material Representation XQJ trays are represented in design documents by width, height, and length. Typical widths range from 100 mm to 800 mm, heights from 50 mm to 200 mm, and lengths from 1 m to 9 m. Materials include galvanized steel, plastic-coated steel, nickel-plated, or hot-dip galvanized steel, with surface treatments indicated in specifications to reflect corrosion resistance and environmental suitability. Installation Orientation and Layering In schematics or installation plans, XQJ trays are represented according to their mounting orientation: Overhead along ceilings or pipe galleries Hanging under floor slabs or beams Side-mounted along walls, columns, or tunnels Multi-layer arrangements for separating weak current, control, and power cables to avoid interference and facilitate cooling Layering is often depicted in drawings with upper layers for weak current cables and lower layers for power or control cables, ensuring proper shielding and maintenance access. Accessories and Support Representation Designs also include brackets, supporting arms, junctions, and installation accessories, which are...
