

ZKM Integrated Distribution Box

Overview

It is an intelligent product integrating data collection, communication, reactive power compensation, power grid parameter analysis, control and other functions required by the smart grid. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Smart DB boxes have extra parts like energy monitoring units and communication modules. It has two or more functions of metering. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
